

CHEVRON LAMINATE WALL PANEL

45° joint edge cut by our professional carpenters with brand new machines make the joints between laminates into the thinnest and less obvious. Backed with 6mm plywood board, the wall panel can be installed at ease and is able to match different wall sizes, creating a seamless and elegant look for interiors.

Simply apply our panels on a flat and smooth surface with glue and hold it overnight.

Produced by our E0 laminate and plywood, these stylish looked odor-free wall panels are perfect for all kind of projects including residential and commercial. With more than 500 patterns available from our TOPPAL and WINDECO catalogues, designers can find the best match for all kind of interior styles.
